

Backend Engineer - Python (Job Description)

Company: Northbridge Analytics

We are hiring a Backend Engineer to build and maintain our core API platform. You will design REST APIs, own data models, and work closely with the data science team to ship ML-powered features.

Required Skills

Python, Django, REST API design, PostgreSQL, Docker, Git, unit testing.

Preferred Skills

AWS, CI/CD pipelines, Celery, Redis, prior experience with LLM or ML-adjacent products.

Experience

Minimum 3 years of professional backend development experience.

Education

Bachelor's degree in Computer Science or a related field.
